In-Person Mobile Elevating Work Platforms & Fall Protection Training

OSHA requires operators, supervisors, and vehicle occupants to undergo training before using Mobile Elevating Work Platforms (MEWPs) and telehandlers. Schedule your personalized, comprehensive group instruction today - **Ensure your team is ready to do the heavy lifting!**

MEWP Training & Certification

Your team receives personalized, on-site instruction completed within a few hours.

- Comprehensive training for on-site vehicles
- Skills development for safe operation and risk-avoidance
- Fall protection for MEWP occupants - built-in & fall arrest accessories
- Proper techniques for managing fuel or battery charging
- Understanding the principles of balance, stability, and capacity
- Hazard awareness instruction - general & specific to your facility
- Steps for reporting an accident
- Daily safety inspection checklist

The Apex Pros will work individually with your team to provide them with the skills needed to operate the Class 7 vehicles on your project safely –remember, training is required for owned or rented equipment.

Class 7 Vehicles

- Scissor Lifts
- Aerial Lifts
- Telehandlers
- Boom Lift
- Articulating Boom Lifts

OSHA & ANSI Requirements--Use & Fall Protection

- **Operators** - Must be certified in all aspects of operation and safety according to OSHA and ANSI guidelines.
- **Supervisors** - People who directly supervise MEWP operators.
- **Occupants** - Safe use & fall protections for people working from but not operating the equipment.

Be compliant, Be safe, Be productive! Call today to schedule your group training.
