Find It At Apex!

High-Output, Multi-Shift Automated Vehicles

Match your needs and budget with the most effective equipment to reach your productivity goals.

Automated vehicles use advanced self-driving technology to navigate unrestricted routes and perform repetitive tasks with unparalleled speed and precision. Smart fleet applications are scalable and adaptable to your specific inventory and processing needs, from small-item AMR units to large-capacity AGFs & AGVs. Automated forklifts also include manual override features, enhancing their serviceability and functionality.

Automated Guided Forklifts

- » Order Pickers
- » Tow Tractors
- » Pallet Stackers
- » Narrow Aisle & VNA Trucks

Automated Guided Forklifts

- » FoxBot—A forklift dedicated to trailer loading and unloading. It is fully autonomous and does not require IT or WMS integration.

Autonomous Mobile Robots

- » Increased Efficiency
- » Improved Safety Cost
- » Savings
